

## About TATHYA

**TATHYA**, open access peer-reviewed biannual online DATA Journal launched by **Research for Resurgence Foundation (RFRF)** is the first of its kind from Bharat, for publication of data from all fields.

The journal seeks to publish data generated during research from all areas for its interactive use through collaborative articles to facilitate reproducibility and find multiple applications across various fields with due credit of the data to the author or his institution.

These data articles will aid higher research by enhancing the reach and impact of the research's increased view and citation and also promote the community's benefit.

RFRF wishes to make this DATA available to such researchers through this DATA Journal.

Publishing your "Data" in Tathya brings the following advantages;

- ✓ Better access to data
- ✓ Since data can find multiple applications across various fields, provides relatively large citations
- ✓ Interactive use of data through collaborative articles.

TATHYA welcomes quality submissions from varied disciplines as well as Interdisciplinary research.

The data is vigorously peer-reviewed, crafted, formatted, indexed, given a DOI, and made publicly available to all upon publication.

The articles need to be made publicly available under an open license through a depository.

## Manuscript Submission

Please provide the "Data Article" submission in the following format

Title

Name

Affiliations

Graphical Abstract

Data Collection Methodology

- Experimental Data
- Survey Data
- Primary Data
- Secondary Data
- Observational Data
- Modelling Data

Figures and Tables of Data

Quality of Data/ Uncertainty Analysis

Units Used and Unit System (Give Table)

Suggested Applications of Data

References

Acknowledgment

*Imparting value to Data*

Submit the article online on our website  
[www.rfrfoundation.org](http://www.rfrfoundation.org) or email to
